AvePro Solar Mesh Clips

AvePro Solar Mesh

One in five homes in Australia have some form of roof top solar array. Disease carrying pigeons are now taking over domestic and commercial solar systems and nesting, roosting and fouling roofs like never before.

Pest birds and vermin will foul gutters and water harvesting storage and permanently damage building surfaces.

The smell, noise and mess can be devastating.

AvePro Solar Mesh is a HDPE (non-metal) mesh with a 10-year manufacturer's warranty and can be installed around your solar panels to exclude pigeons.

AvePro Solar Mesh and our unique Solar Mesh Clips will deny pigeon access without damaging your solar panels or roof.
