

Insect traps

GLUETRAP

As a decorative accessory, this wall lamp is designed with both private individuals and professionals in mind: homes, balconies, patios, mobile homes, camping trailers, offices, retail outlets, restaurant dining rooms, hotels, reception areas, doctors' and vets' surgeries, analysis laboratories, day nurseries, schools, retirement homes, etc.

Directions

- Mount as a wall lamp 1.80 to 2.20 metres above ground level and away from light sources.
- Servicing: replace the lamps/tubes annually and the glue board every 2 months*.
- Pests: flies, mosquitoes, midges, etc.
- Tip: the wall lamp is turned into a light source in winter by using a lamp for illumination (E14)

*If left on 24/7.

Average lifespan of a lamp: 9000 hours

Optional
