

# THE RABBIT MAGNET INSTRUCTION MANUAL

Version 1. 2019

**Code:** 07-Trap18 Rabbit Magnet Trap  
**Size:** 550mm x 220mm x 220mm

**DOWNLOAD FOR FULL INSTRUCTION MANUAL from [www.PestIT.com.au](http://www.PestIT.com.au)**

**MynaMagnet Australia** presents the Rabbit Magnet trap and accessories. This is the latest development in heavy-duty, professional and collapsible Rabbit Traps from the company that has designed & marketed the world's leading Indian myna trap - the Myna Magnet. This trap is used to manage small native marsupials as well as pest rodents and we wish to take this opportunity to thank you for purchasing a Rabbit Magnet. Here are some brief assembly instructions to assist you with your trapping process.

### Stage 1 – Assembly

Above shows the Rabbit Magnet carton contents.  
See below for details of items 1-6.

### Stage 2 – Trapping mode

Above shows the complete trap ready for use in an industrial application.

## Packing List

The carton containing your Rabbit Magnet will include the following items. Please check before starting assembly.

1. The main Rabbit Magnet Trap assembly (4 walls connected with hinges, with the floor including treadle plate and plate arm).
2. Rear Door assembly
3. Front Door assembly
4. Set (8) Split Pins
5. Set (4) of replacement Spring Hinges
6. Set (10) heavy-duty single use Cable Ties
7. Rabbit Magnet Instruction Manual

## How to Set Up Your Rabbit Magnet

1	Your trap has a series of Spring Hinges that are pre-installed. These Spring Hinges will hold the four panels together.	
2	First task in assembling your Rabbit Magnet is to insert the Treadle Plate Arm into the slot at the front of the roof panel. Push in between this section as shown.	
3	Ensure that the Treadle Plate Arm sits in this position before further steps are taken. Then fold the trap into a box shape.	

4	<p>Your trap contains a pack of 10 heavy-duty Cable Ties. Once you have folded the four sides together into a box shape, attach three to four cable ties to secure the floor and fourth panel together. Cut cable tie tabs off.</p>		
6	<p>Insert the Front Door Panel into the trap, ensuring that the four Lugs enter the opposing four holes on the front of the trap. Then inset the split pins into the 4 Lug holes.</p>		
7	<p>Insert the split pins into the lugs at the front door. Then bend the split pins inside the trap (up and down) to ensure that this locks the doors in place. This should solidify the trap and limit movement when in use.</p>		
7	<p>Your trap should now be assembled, solid and ready to go. Shown here with the larger Cat Magnet.</p>		
8	<p>To set your Rabbit Magnet Trap, lift up the front door and insert the Treadle Arm as shown. The Rabbit Magnet here is shown ready for baiting (use fresh chicken pieces) in an industrial area. The location of your trap is critical to its success, this naturally depends on the species of animal to be trapped.</p>		

**PLEASE NOTE: PRIOR TO COMMENCING YOUR RABBIT MAGNET TRAPPING PROCESS, PLEASE CHECK THE CURRENT REGULATIONS IN YOUR STATE.**

**Local legislation and Animal welfare considerations:**

Cruelty to animals is a major issue for professional pest managers, industry and the public. Follow the below link from the Australian Government in relation to animal welfare considerations.
